👤 PROFILE

I am an adaptable developer with a passion for problem-solving and a strong drive to learn. With 3+ years of experience, I am committed to delivering exceptional results to my clients. While my expertise lies in back-end development, I am eager to expand my skills and take on new challenges.

I am dedicated to empowering businesses with data-driven decision-making and innovative solutions that utilize cutting-edge technology.

With a self-motivated approach and innate curiosity, I continuously seek to improve and innovate, delivering high-quality results to every project I work on.

📁 EXPERIENCES

Developer at Freelance

2021 — Present

As a freelancer, I offer a wide range of services including python development, web scraping, and crawling, cloud administration, and web automation. My skills and experience in these areas have allowed me to successfully complete various projects for clients, resulting in increased efficiency and automation for their businesses. I am dedicated to delivering high-quality and effective solutions that meet my client's unique needs and exceed their expectations.

IT General at BmaltaGroup, Malta

August 2022 — March 2023

Proven track record of successfully developing and maintaining websites using open-source tools to optimize team workflow and efficiency. Skilled in managing company databases and Linux servers for the smooth operation of applications, websites, and data. Expertise in utilizing open-source systems resulting in cost savings and improved team productivity and tangible business outcomes.

Linux Server Managment at Freelancer

2021 — 2022

Experience in maintaining, troubleshooting, and optimizing performance, security, and software. Strong background in Linux systems and personal experience using Linux. Skilled in configuring and optimizing servers, implementing security measures, and troubleshooting common issues, including experience with Apache, Nginx, MySQL, and DNS. Able to improve performance, security, and scalability of servers managed.

Bots Development | Scraping at Self-employed

2020 — 2022

Python expert in web automation, improving efficiency and automating tasks like data scraping and form filling. Used real user simulations to gather undetected data, leading to revenue generation. Skilled in web scraping and crawling for valuable insights.
