Profile

I am an experienced back-end developer with a strong drive to learn, develop solutions, and create exceptional experiences for my clients. With **3 years of experience**, I am dedicated to delivering high-quality results, utilizing my **self-motivated approach** and **innate curiosity** to continuously improve and innovate.

Experiences

IT General, BmaltaGroup, Malta

2022 – PRESENT

Proven track record of successfully developing and maintaining websites using open-source tools to optimize team workflow and efficiency. Skilled in managing company databases and Linux servers for the smooth operation of applications, websites, and data. Expertise in utilizing open-source systems resulting in cost savings and improved team productivity and tangible business outcomes.

SaaS, Self-employed

2021 – PRESENT

Experienced in delivering high-quality SaaS solutions, successfully developed and launched bots for popular websites, resulting in a consistent revenue stream. Strongly passionate about SaaS and always seeking to learn and grow. Skilled in staying up-to-date with the latest trends and technologies in SaaS and developing new projects to improve my skills. An asset to any organization.

Web Automation/Scraping, Freelancer

2020 – PRESENT

Expert in web automation using Python to create scripts for various websites, improving efficiency and automating tasks such as data scraping and form filling. Successfully used real user simulations to gather large amounts of data undetected, leading to revenue generation and other benefits. Skilled in web scraping and crawling to quickly gather thousands of data points providing valuable insights for companies.

Linux Server Managment, Freelancer

2021 – PRESENT

Experience in maintaining, troubleshooting, and optimizing performance, security, and software. Strong background in Linux systems and personal experience using Linux. Skilled in configuring and optimizing servers, implementing security measures, and troubleshooting common issues, including experience with Apache, Nginx, MySQL, and DNS. Able to improve performance, security, and scalability of servers managed.
