Profile

I am an experienced back-end developer with a strong drive to learn, develop solutions, and create exceptional experiences for my clients. With **3 years of experience**, I am dedicated to delivering high-quality results, utilizing my **self-motivated approach** and **innate curiosity** to continuously improve and innovate.

Empowering businesses with innovative solutions through data-driven decision-making and cutting-edge technology.

Experiences

IT General, BmaltaGroup, Malta

AUGUST 2022 – PRESENT

Proven track record of successfully developing and maintaining websites using open-source tools to optimize team workflow and efficiency. Skilled in managing company databases and Linux servers for the smooth operation of applications, websites, and data. Expertise in utilizing open-source systems resulting in cost savings and improved team productivity and tangible business outcomes.

Developer, Freelance

2021 – PRESENT

As a freelancer, I offer a wide range of services including python development, web scraping, and crawling, cloud administration, and web automation. My skills and experience in these areas have allowed me to successfully complete various projects for clients, resulting in increased efficiency and automation for their businesses. I am dedicated to delivering high-quality and effective solutions that meet my client's unique needs and exceed their expectations.

Website | e-Commerce Creation, Freelancer

2017 – 2022

With experience in website and e-commerce development using WordPress, I have a proven track record of creating visually appealing and user-friendly websites that drive online sales and engagement. I have experience in customizing themes and plugins, as well as integrating various e-commerce platforms such as WooCommerce. I am well-versed in website optimization and SEO best practices, ensuring a strong online presence for my clients. In addition, I am able to troubleshoot and solve any technical issues that may arise. My goal is to help businesses establish and grow their online presence, driving growth and revenue through effective website development.

Linux Server Managment, Freelancer

2021 – 2022

Experience in maintaining, troubleshooting, and optimizing performance, security, and software. Strong background in Linux systems and personal experience using Linux. Skilled in configuring and optimizing servers, implementing security measures, and troubleshooting common issues, including experience with Apache, Nginx, MySQL, and DNS. Able to improve performance, security, and scalability of servers managed.

Bots Development | Scraping, Self-employed

2020 – 2022

Expert in web automation using Python to create scripts for various websites, improving efficiency and automating tasks such as data scraping and form filling.

Successfully used real user simulations to gather large amounts of data undetected, leading to revenue generation and other benefits. Skilled in web scraping and crawling to quickly gather thousands of data points providing valuable insights for companies.

Education

Self-Taught

As a self-taught developer, I may not have a formal degree or education in the field, but I have honed my skills through a combination of self-study and hands-on experience. I have a strong curiosity and a desire to learn new things, which has led me to seek out knowledge on forums, YouTube, and other online resources. While I may not have a comprehensive understanding of all aspects of development or technical topics, I have learned what I need to in order to be successful in my work. Additionally, I am confident in my ability to quickly learn and adapt to new technologies and concepts.

Hight School, Brazilian School

2014 – 2018

Courses
